Conditions and Notes

Number portability - All business lines are portable to National Phone & Data DBT provided you are in a DBT enabled area.

Availability - DBT covers 95% of the business community. Some areas of Sydney cannot take advantage of DBT technology. National Phone & Data require the number of a Telstra PSTN line to pre-qualify your site for this service.

Lead time - 20 working days is the usual installation time frame for this service. Number porting time frames can extend this.

Alarm systems - If you have a back to base alarm system, it is important to ensure at least one Telstra line is set aside and maintained for this use. This line can also be used as an emergency fallback.

Minimum line requirement and call usage - There is a minimum of 4 incoming lines required to use this service. If relocating or switching to National Phone & Data, a minimum of 3 numbers must be ported. A minimum of \$40 call usage per month per line applies. This is aggregated across all lines.

Relocation - If you relocate your business, relocation charges apply. If the DBT service cannot be provided at the new location, your telephone and a data service is required until completion of contract.

Termination of Contract - If the contract is terminated by the client early, then the monthly reoccurring charges is required to be paid out.

Terms and conditions - Full terms and conditions are disclosed when further interest of this product is expressed.

Billing and Payment - For your convenience, we offer your Internet & Phone on a single bill each month.

Payments terms are strictly 14 days from date of invoice.

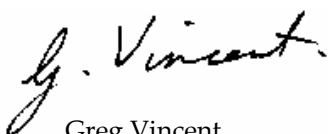

Express your Interest

National Phone & Data offers a free review of your companies phone account.

If you wish to proceed with this, please fax your current Phone bill, including all pages, to National Phone & Data on (02) 8080 8330. National Phone & Data will then send you back a chart of calls and savings.

If you have any questions, please call Greg on **02 8228 7777**

Kind regards,

Greg Vincent
